

Trial Participant: Apé Canada Corporation

Transportation Innovation Challenge #2: Micro-Utility Devices

TRIAL PARTICIPANT INFORMATION

Apé Canada is the national importer and distributor of two personal assistance devices: the Gita and Gita mini. These devices transport small volumes of goods and operate by following the user as they walk. The devices are developed by Piaggio Fast Forward, a robotics company that was acquired by Piaggio, an Italian small vehicle manufacturer. For the Trial, Apé Canada demonstrated the Gita device.

Category(ies): Personal Assistance, Delivery Device

DEVICE SPECIFICATIONS

Device size:

69cm x 56cm x 61cm

Device weight:

23kg

Maximum speed:

9.5km/h

Sensors included:

Cameras, Lidar
